

TUBA K.

Aspiring Data Analyst / AI & Machine Learning Associate

India | tubak8665@gmail.com | GitHub: github.com/tubak8665-lgtm

PROFESSIONAL SUMMARY

Analytical and detail-oriented aspiring Data Analyst & Machine Learning Associate pursuing a Diploma in EXTC (Final Year). Proficient in end-to-end data processing workflows, Exploratory Data Analysis (EDA), statistical interpretation, and predictive modeling using Python, Pandas, NumPy, and Scikit-Learn. Hands-on experience developing AI solutions ranging from financial risk evaluation to medical imaging (Chest X-Ray analysis) and Large Language Models (LLMs).

TECHNICAL SKILLS

Machine Learning & AI: Supervised & Unsupervised Learning, Classification, Regression, Feature Engineering, Model Evaluation, LLMs, Computer Vision

Data Analysis & Statistics: Exploratory Data Analysis (EDA), Data Cleaning, Handling Missing Values, Probability Formulas & Descriptive Statistics

Programming & Data Manipulation: Python (Data Types, Loops, Functions, Error Handling), Pandas (Series, DataFrame), NumPy (Arrays & Math)

Data Visualization & Tools: Matplotlib, Seaborn (Histograms, Scatter Plots, Bar/Line Charts), Google Colab, Jupyter Notebook, Git/GitHub, MS Excel

KEY PROJECTS

Chest X-Ray AI Classification & Medical Imaging Analysis

Python, Machine Learning, Computer Vision, Google Colab

- **Medical Data Processing:** Preprocessed chest X-ray image datasets, performing feature extraction and handling missing or noisy data points for classification.
- **Model Training & Evaluation:** Implemented Machine Learning classification algorithms with train-test split validation to analyze medical image features.
- **Interpretation:** Evaluated model accuracy, precision, and recall metrics to assist in identifying abnormalities in chest X-ray scans.

LLM Application & Intelligent Text Processing System

Python, LLM, Generative AI, Google Colab

- **Generative AI Workflow:** Utilized Large Language Model (LLM) architectures to process, analyze, and interpret unstructured text data.
- **Prompt Engineering & NLP:** Designed structured prompts and pipeline functions to improve response accuracy and system performance.

Credit Card Risk & Statistical Analysis System

Python, Pandas, NumPy, GitHub

GitHub Repository: github.com/tubak8665-lgtm/Credit-Card-risk-analysis

- **Data Simulation & EDA:** Simulated synthetic financial transaction datasets (1,000+ records) using NumPy/Pandas and performed exploratory data analysis (EDA).
- **Visualization & Risk Profiling:** Built Seaborn/Matplotlib visual dashboards (histograms, scatter plots) to segment transactions into risk tiers.

EDUCATION

Diploma in Electronics and Telecommunication Engineering (EXTC) — Third Year (Final Year)

Alamuri Ratnamala Institute of Engineering and Technology

CERTIFICATIONS & LEARNING

- **Machine Learning & Applied Data Science Fundamentals** — Practical Hands-on Project Implementation
